Price:

23890.00 \$

1966 Ford F100, 96169 miles, was my father's truck and when he passed in 1994 we have stored repaired replaced and kept it current

Great truck for hot rod shows, family fun, work truck or an excellent core for custom mod

We have owned truck for over 25 years, always, always kept indoors, storage over winter never driven in the rain, snow, sleet or salt

Truck has been repainted a few times in those years

Last restoration project we replaced all the chrome and repainted

Added a stereo system with cd player

Originally was as a straight six engine, three on the tree –converted to:

1979 Lincoln continental Ford 460 V8 with 650 Holley carburetor, electronic distributor, straight pipes with glass pack mufflers(sounds good) and C6 automatic transmission with B&M three speed shifter

Chrome reversed wheels with moonie hubs, raised white letter 60 style tires

Last summer new starter, new alternator, new solenoid, new copper wiring for them from the new battery

This month we just did a full on brake job, replaced shoes, wheel brake cylinders, brake fluid flush, replaced a few drums front with wheel bearings and it was really nicely. Replaced hydraulic brake light switch, new tail light, new tail change, fluid check.
