5000.00 \$

This little silver manual truck is amazing. We love it very much and has been in our family for decades, running smoothly. We are sad to give it up, but just lost our prius in a collision accident and are needing a more family-accommodating vehicle. It's driven all around WA and OR states and does well in the mountains and even can handle the cities fairly well because of its smaller size. This standard toy tacoma doesn't even have 200k on it and is expected to handle many more miles in its lifetime. It's been freshly detailed and upholstery cleaned, has been used in the last two years as a work-commute truck for an arborist and before that was owned by a single man in the wilderness of Oregon. There are minor cosmetic and some normal wear and tear, such as a tiny ding on the windshield and some upholstery staining from dogs, has great breaks and clutch. Again, we absolutely love this truck and are sad to see it go--definitely a decision out of necessity not choice, but are hoping it goes to someone who can appreciate it as much as we do. It comes with a rack for the bed and snow chains. Please text/call/email preferred with any questions and we are happy to answer.
