1800.00 \$

1988 GMV High Sierra 2500 with 168 k miles. Had engine replaced at 153k and new transmission at 140k. also alternator at 155k. have all receipts for this truck going back to early 90's. Bad news is tree landed on it which caused the damage in the pictures. Bought it back from insurance and have salvage title due to having basically new engine and tranny with thought of fixing it but never got around to it. something wrong with charging so runs off battery when I start it up every couple months. had alternator tested and it's fine so don't know. also front tire won't hold air so I have it blocked up. It runs and drives fine but will need some work
